# Server Documentation

## Domain: corp. local

---

# Server: DC1……..

**Hostname:** DC1
**Role:** Domain Controller
**Operating System:** Microsoft Windows Server 2022 Standard
**Domain:** corp.local

**Hardware**: HP ProLiant DL380 Gen10 Plus Server

- Processor: **2 × Intel Xeon Silver**
- Memory: **128 GB RAM**
- Storage Configuration: **RAID Storage Array**
- Total Storage Capacity: **12 TB**
- Network: Integrated enterprise network interface
- Form Factor: Rack-mounted enterprise server
- Operating System: **Windows Server 2022 Standard**

---

## Network Configuration

- IP Address: 10.6.69.205
- Subnet Mask: 255.255.255.0
- Default Gateway: 10.6.69.1
- Preferred DNS: 10.6.69.205
- IPv6 DNS: ::1
- DHCP: Not configured

---

## FSMO Roles

All FSMO roles are hosted on DC1:

- Schema Master
- Domain Naming Master
- RID Master
- PDC Emulator
- Infrastructure Master

---

# Installed Roles

- Active Directory Domain Services (AD DS)
- DNS Server

---

# Active Directory Structure

## Organizational Units

**NetBIOS Name:** CORP
**Domain Functional Level:** Windows Server 2016
**Forest Functional Level:** Windows Server 2016
**Global Catalog:** Enabled

corp. local

- Domain Controllers
- Lund
  - Users
  - Computers
  - Groups
- Stockholm
  - Users
  - Computers
  - Groups
- Resource Groups
- Servers

---

# User and Group Model

**Lund — Departments**

- Sales
- Economy
- Consultant

**Groups:**

- GG_Lund_Sales
- GG_Lund_Economy
- GG_Lund_Consultant

**Administrative Groups:**

- GRP_Lund_OU_Admins
- GRP_Lund_LocalPC_Admins

**Computer Group:**

- GG_Lund_Computers

---

**Stockholm — Departments**

- Boss (Management)
- Sales
- Economy
- Consultant

**Groups:**

- GG_Stockholm_Boss
- GG_Stockholm_Sales
- GG_Stockholm_Economy
- GG_Stockholm_Consultant

**Administrative Groups:**

- GRP_Stockholm_OU_Admins
- GRP_Stockholm_LocalPC_Admins

**Computer Group:**

- GG_Stockholm_Computers

---

### AGDLP Model

Users
→ Global Groups (GG_)
→ Resource Groups (RG_RW / RG*_R)
→ NTFS Permissions

- No users assigned NTFS permissions directly
- Only Resource Groups assigned NTFS permissions

---

# DNS Configuration

### Zones

- corp.local (AD-integrated)
- _msdcs.corp.local (AD-integrated)
- Reverse lookup zones
- jultomten.nu (Conditional Forwarder)

### Forwarders

- 10.6.69.210
- 8.8.8.8
- Root hints enabled

### Conditional Forwarder

- Domain: jultomten.nu
- Target Server: 10.6.69.210

Internal and external DNS resolution operational.

---

# Password Policy

## Default Domain Policy

## Fine-Grained Password Policy

Policy Name: PSO_Admins_Strict

- Minimum Password Length: 10
- Password History: 24
- Complexity: Enabled
- Lockout Threshold: 3

Applied To:

- Domain Admins
- GRP_Stockholm_OU_Admins
- GRP_Stockholm_LocalPC_Admins
- GRP_Lund_OU_Admins
- GRP_Lund_LocalPC_Admins

---

# Group Policy Application

## Lund

Users OU:

- GPO_DriveMapping_Lund
- GPO_FolderRedirection_Lund
- GPO_Background_Lund

Computers OU:

- GPO_LocalAdmin_Lund
- GPO_Software_Clients
- GPO_Printer_Lund_COMPUTER

---

## Stockholm

Users OU:

- GPO_FolderRedirection_Stockholm

- GPO_DriveMapping_Stockholm
- GPO_Background_Stockholm
- GPO_Lockdown_Stockholm_Users

Computers OU:

- GPO_LocalAdmin_Stockholm
- GPO_Software_Clients
- GPO_Printer_Stockholm_COMPUTER

---

## Server Logon Restriction

GPO_Server_Logon_Restriction applied to Servers OU.

Only authorized administrative groups are allowed to log on to FS1.

---

## Administrative Model

Delegated administration per location:

- GRP_Lund_OU_Admins
- GRP_Stockholm_OU_Admins

Local workstation administration:

- GRP_Lund_LocalPC_Admins
- GRP_Stockholm_LocalPC_Admins

Domain Admins unrestricted.

---

## Redundancy Design Consideration

The current environment operates with a single domain controller.

The design supports deployment of an additional domain controller for redundancy and high availability.

A secondary domain controller would:

- Run Microsoft Windows Server 2022 Standard
- Install Active Directory Domain Services
- Install DNS Server role
- Operate as Global Catalog
- Host AD-integrated DNS zones
- Participate in multi-master replication

This would provide authentication redundancy, DNS redundancy, and increased fault tolerance.

The current environment size does not require an additional domain controller.
The existing configuration supports immediate expansion.

---

# Server: FS1……

**Hostname:** FS1
**Role:** File Server and Print Server
**Operating System:** Microsoft Windows Server 2022 Standard
**Domain Membership:** corp.local

**Hardware**: HP ProLiant DL380 Gen10 Plus Server

- Processor: **2 × Intel Xeon Silver**
- Memory: **128 GB RAM**
- Storage Configuration: **RAID Storage Array**
- Total Storage Capacity: **12 TB**
- Network: Integrated enterprise network interface
- Form Factor: Rack-mounted enterprise server
- Operating System: **Windows Server 2022 Standard**

---

## Network Configuration

- IP Address: 10.6.69.206
- Subnet Mask: 255.255.255.0
- Default Gateway: 10.6.69.1
- Preferred DNS: 10.6.69.205
- DHCP: Not configured

---

## Disk Configuration

- Disk 0: 60 GB (System – C:)
- Disk 1: 30 GB (Data – E:)
- File System: NTFS

All company data stored on E:\

---

# Shared Folders

# Print Server Configuration

Printers:

- PRN_Lund
- PRN_Stockholm

Configuration:

- Driver: Generic / Text Only
- Port Type: Local Port
- Port Path:
    - C:\Temp\PRN_Lund.txt
    - C:\Temp\PRN_Stockholm.txt
- Shared: Yes
- Published in Active Directory: No

---

# Security Configuration

- Centralized document storage
- Access controlled via security groups
- No cross-department write access
- No cross-location write access
- Restricted user environment for Stockholm
- Administrator accounts excluded from user restrictions

---

# Environment Scope

- Single domain controller deployment
- Static IP configuration for all servers
- No DHCP server deployed
- Designed for controlled internal network environment
